

Serving the New Jersey & New York areas since 1972

PHOSfree DIRECTIONS

Directions:

1. If pool has algae, follow dealer instructions to treat.
2. Follow dealer instructions to balance water chemically.
3. Clean or backwash filter, if necessary.
4. Refer to PHOSfree product back chart for dosage.
5. With filter running, shake bottle well, and add required dose directly to skimmer.
6. Run filter 8 hours a day for one week or 48 hours continuously without backwashing or cleaning.

Refer to Phosphate Removal Tip Sheet located in the Learning Center in the Document Library for detailed instructions.

When phosphates levels are 100ppb or less, begin Pool perfect+ Phosfree as a weekly maintenance.

Phosphates enter your pool from a variety of sources (from your yard/area or neighboring yards/areas), including:

1. lawn & garden (lawn care products; fertilizers, sprays, mulch, etc.)
2. chemicals & cleaners
3. rainwater & fill water
4. body fluids & waste (urine, sweat, dead skin cells, etc.)
5. decaying vegetation
